Dosing pump ATO

Dosing pump ATO is a smart solution from Reef Factory designed for automatically topping up evaporated water in the aquarium. This incredibly precise tool is the result of combining an ultra-accurate pump with liquid level sensors. The Dosing pump ATO detects a drop in water level and automatically replenishes it, helping to maintain the desired salinity and stable parameters.

Thanks to precise data, monitoring the amount of added water to the system is very easy. The Smart Reef application allows you to set an alarm that informs you about the remaining water in the top-up container. Furthermore, unlike traditional pumps used in automatic top-offs, Reef Factory's solution is rust-free, thanks to the use of a dosing pump.

Key Features

- Precision in water dosing - as little as 0.01 ml
- Rust-free assurance
- Accurate statistics of water dosed into the aquarium
- Information and alarm for the capacity of the RO/DI water top-up container
- World-class Smart functionality
- Silent operation
- Durable tubing for the dosing pump
- Easy DIN rail mounting
- The pump is one of over 20 Smart devices offered by Reef Factory, allowing you to build the largest system of devices in a single application.

The pump has a control panel in the Smart Reef app, which allows remote management of the device, as well as planning and reviewing the history of top-offs. Alerts will inform you about important events in the aquarium. Dosing pump ATO operates on WiFi technology. This innovative solution from Reef Factory elevates and revolutionizes the way evaporated water is topped up. Precision, rust-free assurance, and the best Smart functionality in the world!

Smart Features

- Remote management of the device through the Smart Reef app
- Statistics on dosed water
- Information about the container and an alarm for low water levels
- Time-based mode - regular automatic dosing of the specified amount of water
- Quick dosing edits and the ability to add an extra dose outside the schedule
- Automatic top-up pause from the app
- Smart notifications
